

GENDER EQUITY IN CANCER CARE LIVED AND LIVING EXPERIENCE OF CANCER

Thank you for your interest in the Gender Equity in Cancer Care Research Project.

Women's Health Victoria has engaged **Impact Co.**, an independent company, to investigate how gender impacts women (cis and trans), trans men and gender diverse people's experiences of cancer care in Victoria.

Women's Health Victoria is a statewide not-for-profit organisation dedicated to improving health outcomes for women (cis and trans inclusive) and gender diverse people in Victoria.

We want to know about your experiences of cancer care

If you are 18 years old or older, have current or previous experience of cancer care in the state of Victoria or a diagnosis of cancer, we would like to hear about your experience.

- What has been your experience of receiving cancer care?
- How might your gender have impacted your experience of cancer care?
- Have there been any differences in the care you received as a result of your identity, including other factors such as sexuality, age or where you live?
- Do you have any suggestions for improving cancer care?

If you have any questions, please contact the Impact Co. Research Team at hannah.kennedy@impactco.com.au

How you can share your experience

You can choose to complete a short 15-20-minute online survey or express interest in taking part in a 1-hour interview with two of our researchers. If you like, you can take part in both parts of this research.
